2. You will have to build a webpage with a form for registering the following personal information:

- Id card number (DNI format)
- Surname (Max 30 chars)
- Name (Max 15 chars)
- Date of birth
- Nationality (Using a drop-down list) – Spanish has to be selected by default
- e-mail (e-mail format)
- Password (Max 10 chars)
- Sex (using Radio buttons)
- Other comments (using TextArea)
- Confirm the wish to receive more information through e-mail (Using a checkbox)- It has to be checked by default
- Group Form Data with fieldset and legend elements
- Submit and Reset buttons

Form's attribute action will be a link to <http://jkorpela.fi/cgi-bin/echo.cgi>. This file will allow you to get the results of the data transmission to the server. Use POST method for sending the information to the server.
